ORDER TODAY, AND YOU WILL BE SURE TO GET YOUR STOCK IN TIME FOR PLANTING

Our 1911 Salesman

We present herewith our catalogue for the Spring of 1911 and hope to be favored with your orders. Our aim will be to supply good nursery stock at reasonable prices. We shall not attempt to give extravagant descriptions tending to mislead, but will endeavor to make them clear and concise. We believe that our patrons will appreciate this. We invite your attention to some of the advantages to be obtained by purchasing from us.

BUY DIRECT FROM THE GROWER

The advantage in buying from us is that you save the **Middleman's Profit, Agents' Commissions, Freight Charges, etc.**

We have been in business for many years, but have heretofore sold our goods mostly to jobbers. We can save you the middleman's profit and sell at low prices because we are growers, handle large quantities and are satisfied with a moderate profit.

FREIGHT PREPAID

In order to introduce our goods we offer to prepay the freight to all points east of the Mississippi River on all orders which amount to \$5.00 or over at the prices in this catalogue.

GUARANTEE

We guarantee that our stock is true to name under the following conditions:

In growing and furnishing all nursery stock we use the greatest care to have it true to name, and will replace any that may prove untrue. But no sale by us carries a warranty of quality, express or implied, and for any error we shall not be liable for more than the purchase price. Every purchase from us is made on these terms.

EARLY ORDERS ADVISED. Orders should be sent in early. It is our rule to execute them in the order received. It is advisable to forward goods early. If ground is not in condition to plant, they can be left in the boxes, or taken out and the roots covered with earth.

TERMS OF PAYMENT: ALL ORDERS MUST BE ACCOMPANIED WITH A BANK DRAFT, POST OFFICE MONEY ORDER, EXPRESS MONEY ORDER, OR CURRENCY IN A REGISTERED LETTER, FOR THE FULL AMOUNT OF THE ORDER. NO DEVIATION FROM THIS RULE.

GENERAL INSTRUCTIONS TO PURCHASERS:

Orders should be written out on the order sheet enclosed; this will prevent mistakes.

It is requested that post office and shipping address, as well as explicit directions for marking packages, accompany each order. If the railroad station or express office is different from your post office address, it should be so stated.

CERTIFICATE OF INSPECTION. Our nurseries have been inspected by the New York State authorities and a certificate given, copy of which will be attached to each shipment.

RESPONSIBILITY. As to our responsibility we refer by permission to the Lincoln National Bank and The Rochester Trust and Safe Deposit Company of this city, also to the mercantile Agencies of R. G. Dun & Company and the Bradstreet Company.

ROCHESTER GROWN TREES. Rochester has long been recognized as the "Tree Center of the World." Persons buying from us can rely on getting the very best that can be grown.

RICH LAND NURSERIES

ROCHESTER, N. Y.

No. 1410

STATE OF NEW YORK

DEPARTMENT OF AGRICULTURE

CERTIFICATE OF INSPECTION OF

NURSERY STOCK

This is to Certify that the stock in the nursery of Richland Nurseries of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1911.

Dated, Albany, N. Y. December 2 1910

R. Keaton
Commissioner of Agriculture

Be

Freight Charges Prepaid

It will be worth your while to consider that in addition to the very low prices quoted, we agree to prepay freight charges to points east of the Mississippi River on all orders amounting to \$5.00 and over.

Conditions of Sale. 25 of any one kind of fruit will be furnished at 100 rate, 5 at 10 rate, less quantity at single price. The X grade will not be sold in smaller lots than 10 of each variety.

PLANTING DIRECTIONS.

To be Carefully Observed.

SOIL.—For fruit trees the soil should be dry, either natural or made so by thorough drainage. It should also be well prepared by twice plowing, at least, beforehand. On new, fresh lands manuring will be unnecessary, but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover or well decomposed manure or compost. To insure a good growth of fruit trees land should be in as good condition as for a crop of wheat, corn, or potatoes.

PREPARATION OF THE TREES.—As a general thing, trees are planted in the ground precisely as they are sent from the nursery. In removing a tree, no matter how carefully it may be done, a portion of the roots are broken and destroyed, and consequently the balance that existed in the structure of the tree is deranged. This must be restored by a proper pruning, adapted to the size, form, and condition of the tree, as follows:

Standard Orchard Trees.—These, as sent from the nursery, vary from five to seven feet in height, with naked stems or trunks, and a number of branches at the top forming a head. These branches should all be cut back to within three or four buds of their base. This lessens the demand upon the roots, and enables the remaining buds to push with vigor. Cut off smoothly all bruised or broken roots up to the sound wood. As a general thing it will be safe to shorten all the previous years' shoots to three or four buds at their base, and where the branches are very numerous some may be cut out entirely.

Dwarf Trees.—If of two or three years' growth, with a number of side branches, will require to be pruned with a two-fold object in view, viz., the growth of the tree and the desired form. The branches must be cut into the form of a pyramid by shortening the lower ones, say one-half, those above them shorter, and the upper ones around the leading shoots to within two or three buds of their base. The leader itself must be shortened back one-half or more. When trees have been dried or injured much by exposure, the pruning must be closer than if in good order.

PLANTING.—Dig holes in the first place large enough to admit the roots of the tree to spread out in their natural position; then, having the tree pruned as before directed, let one person hold it in an upright position, and the other shovel in the earth, carefully putting the finest and the best from the surface in among the roots, filling every interstice, and bringing every root in contact with the soil. When the earth is nearly filled in, a pail of water may be thrown on to settle and wash in the earth around the roots; then fill in the remainder and tread gently with the foot. The use of water is seldom necessary, except in dry weather early in fall or late in spring. Guard against planting too deep; the trees, after the ground settles, should stand in this respect as they did in the nursery. Trees on dwarf stock should stand so that *all the stock* be under the ground, and *no more*. In very dry, gravelly ground, the holes should be dug twice the usual size and depth, and filled in with good loamy soil.

STAKING.—If trees are tall and much exposed; to winds, a stake should be planted with the tree, to which it should be tied in such a manner as to avoid chafing. A

piece of matting or cloth may be put between the tree and the stake.

MULCHING.—When the tree is planted throw around it as far as the roots extend, and a foot beyond, five or six inches deep of rough manure or litter. This is particularly necessary in dry ground, and is highly advantageous everywhere both in spring and fall planting. It prevents the ground from baking or cracking, and maintains an equal temperature about the roots.

AFTER-CULTURE.—The grass should not be allowed to grow around young trees after being planted, as it stunts their growth. The ground should be kept clean and loose around them until, at least, they are of bearing size.

Treatment of Trees that have been Frozen in the Packages or Received during Frosty Weather.—Place the packages, unopened, in a cellar or some such place, cool, but free from frost, until perfectly thawed, when they can be unpacked, and either planted or placed in a trench until convenient to plant. Treated thus, they will not be injured by the freezing. Trees procured in the fall for spring planting, should be laid in trenches in a slanting position to avoid the winds; the situation should always be sheltered and the soil dry. A mulching on the roots and a few evergreen boughs over the tops will afford good protection.

DISTANCE BETWEEN TREES OR PLANTS IN PLANTATIONS

Standard Apples, 30 to 40 feet apart each way. In poor soil, 25 feet may be enough.

Standard Pears and Cherries, 20 feet apart each way.

Standard Plums, Peaches, Apricots, 16 to 18 feet apart each way.

Quinces, 10 to 12 feet apart each way.

Dwarf Pears, 10 to 12 feet apart each way. The greater distance is better where land is not scarce.

Currants, Gooseberries and Raspberries, 3 to 4 feet apart.

Blackberries, 6 to 7 feet apart.

Grapes, 8 to 10 feet apart.

Strawberries, 1 foot apart in the row; rows 3 feet apart.

NUMBER OF TREES OR PLANTS ON AN ACRE AT VARIOUS DISTANCES

At 4 feet apart each way,	2729
" 5 "	1742
" 6 "	1200
" 8 "	680
" 10 "	430
" 12 "	325
" 15 "	200
" 18 "	135
" 20 "	110
" 25 "	70
" 30 "	50

The number of plants required for an acre, at any given distance apart, may be ascertained by dividing the number of square feet in an acre (43,560) by the number of square feet given to each plant, which is obtained by multiplying the distance between rows by the distance between the plants. Thus, strawberries planted three feet by one foot gives each plant three square feet or 14,520 plants to the acre.

SUMMER VARIETIES

Early Harvest—Medium size, pale yellow, fine flavor. August.

Red Astrachan—Large, crimson, good; very hardy. August.

Sweet Bough—Large, pale yellow, sweet. August.

Tetofsky—Medium size, yellow striped with red. Very hardy. August.

Yellow Transparent—Medium size, pale yellow; good. August.

AUTUMN VARIETIES

Alexander—Very large, red. Very hardy. September and October.

BISMARCK—Very large, remarkably handsome and showy; color red on yellow ground; flesh yellow; quality good; extremely hardy and prolific and bears very early. November.

Fameuse (Snow Apple)—Medium size; crimson; flesh snowy white, delicious. Succeeds in the North. November to January.

Gravenstein—Very large, striped; of the first quality. September to October.

Maiden's Blush—Large, pale yellow with a red cheek. September and October.

Oldenburg or Duchess of Oldenburg—Large, streaked with red and yellow; juicy and pleasant. A young and abundant bearer. Succeeds well in the Northwest where most varieties fail. August and September.

Wealthy—Medium size, dark red; very good, very hardy. October.

WINTER VARIETIES

Baldwin—Large, bright red. One of the most popular sorts. December to March.

Ben Davis—Large, striped, very hardy. A late keeper. Esteemed in the West and Southwest.

Golden Russet—Medium size, dull russet; Hardy. November to April.

Grimes' Golden—Medium size, golden yellow. January to April.

Hubbardston or Hubbardston Nonsuch—Large, striped yellow and red; fine. Great bearer. November to January.

Jonathan—Medium size, red, juicy and rich. November to March.

Lyman's Pumpkin Sweet (Pound Sweet)—Very large, greenish. October to December.

Mann—Medium size, deep yellow; hardy; an early bearer. January to April.

McIntosh Red—Large, bright red; very good; hardy. November to February.

Northern Spy—Large, striped. One of the finest late keeping apples.

Pewaukee—Medium size, striped. Esteemed especially for cold climates. January to May.

Rambo—Medium size, yellow and red. An esteemed old variety. October to January.

Rhode Island Greening—Everywhere well known and popular. Keeps until March or April.

Roxbury Russet—Medium to large, greenish russet. Keeps till June.

Sutton Beauty—Medium size, yellow striped with crimson. Very good. January and February.

Tolman's Sweet—Medium size, pale yellow. November to April.

Tompin's King (King of Tompkins County)—A red apple of the largest size and finest quality. Hardy. November to January.

Twenty Ounce—Very large, striped; very popular. October to January.

Wagner—Medium size, deep red, excellent. December to May.

Wine Sap—Large, deep red; popular in the West. December to May.

Winter Banana—Large, clear pale yellow. Bears young.

York Imperial—Medium size, shaded with crimson. Popular in Pennsylvania. November to February.

CRAB APPLES

FOR PRESERVING.

All the Crabs are Very Hardy.

Hyslop's—Large, deep crimson. October.

Transcendent—Red and yellow. A popular variety. September.

Whitney—Large, splashed with carmine. August.

Apple Trees are extremely scarce; therefore the placing of orders early is advised.

PEARS

THE Trees furnished are STANDARDS. We also grow all the varieties as DWARFS, which are desirable for gardens or grounds of small extent.

GATHERING PEARS—Summer Pears should be gathered at least ten days before they are ripe and Autumn Pears at least a fortnight. Winter varieties may be left until the leaves fall.

THIN THE FRUIT—When pear trees are heavily laden, the fruit should be thinned when about one-third grown, else the fruit will be poor and the trees injured.

Rivers—Large, creamy white. Early.
Stump the World—Red and white. End of September.

Wheatland—Large, golden yellow, fine. Ripens between Early and Late Crawford.

NOTE

Keep the ground clean and mellow around the trees and give it an occasional dressing of wood ashes. Keep the heads low—the trunks ought not to exceed three feet in height. Attend regularly every spring to pruning and shortening the shoots of the previous year's growth. This keeps the head round, full and well furnished with bearing wood. Cut weak shoots back about one-half, and strong ones one-third; but see that you have a sufficient supply of fruit buds. Sickly and superfluous shoots should be cut clean out.

It should always be borne in mind that the fruit is produced on wood of the last season's growth, and hence the necessity of keeping up a good supply of vigorous annual shoots all over the tree.

In planting peaches it is of the highest importance to cut back the trees severely. The stem should be reduced about one-third and the side branches cut back to one bud. This lessens the demand upon the roots and enables the remaining buds to push more vigorously.

APRICOTS

Price 25 cents each.

The apricot is one of the most beautiful and delicious fruits, and its value is greatly enhanced by the season of its ripening—between cherries and peaches.

GRAPES

HARDY NATIVE GRAPES

Two Year Plants

BLACK GRAPES

Campbell's Early—Large and handsome, sweet. Very early. Each 25c; 10 for \$2.00; 100 for \$15.00.

Champion—A valuable sort to plant where the seasons are short. Each 10c; 10 for 80c; 100 for \$3.50.

Concord—The most popular market grape. Each 10c; 10 for 50c; 100 for \$3.00.

Eaton—A large showy grape. Each 15c; 10 for \$1.00.

Hartford—Very early and reliable. Each 15c; 10 for 80c; 100 for \$4.00.

Moore's Early—Desirable for an early crop. Each 10c; 10 for 80c; 100 for \$5.00.

Wilder (Rogers' No. 4)—One of the best varieties. Each 10c; 10 for 80c.

Worden—Larger than Concord. Ripens a few days earlier and is superior to it in flavor. Very popular. Each 10c; 10 for 80c; 100 for \$4.50.

RED GRAPES

Agawam (Rogers' No. 15)—One of the best of the red varieties. Each 10c; 10 for 80c; 100 for \$4.00.

Brighton—Equal if not superior to Delaware; ripens early. Each 10c; 10 for 80c; 100 for \$5.00.

Catawba—Large coppery red. Each 10c; 10 for 80c; 100 for \$4.00.

Delaware—Small, light red. It justly claims a place in every garden. Each 10c; 10 for 80c; 100 for \$5.00.

Gaertner (Rogers' No. 14)—Beautiful light red. The most showy grape in our collection. Each 15c; 10 for \$1.00; 100 for \$8.00.

Iona—Keeps till mid-winter with its freshness unimpaired. Each 10c; 10 for 80c.

Lindley (Rogers' No. 9)—Another fine red grape. Each 10c; 10 for 80c.

Concord Grape

SEE OUR OFFER TO PREPAY FREIGHT CHARGES.

Salem (Rogers' No. 53)—One of the most popular of the Rogers. Each 10c; 10 for 80c; 100 for \$5.00.

WHITE GRAPES

Green Mountain—The earliest white grape; delicious. Each 20c; 10 for \$1.50.

Moore's Diamond—Juicy and almost without pulp. Each 10c; 10 for 80c; 100 for \$5.00.

Niagara—All things considered, probably the most valuable white grape in cultivation. Each 10c; 10 for 80c; 100 for \$4.00.

BLACKBERRIES

IN the garden, plant in rows, about five feet apart, and four feet apart in the rows. In the field, plant in rows six feet apart, and three feet apart in the rows. Treat the same as Raspberries. They may be planted in the Fall or Spring.

ALL STRONG PLANTS

Agawam—Medium size, jet black, sweet. Hardy and very prolific. Early. 10 for 35c; 100 for \$2.00.

Ancient Briton—Medium size, melting, without core. Hardy and one of the best. 10 for 35c; 100 for \$2.00; 1000 for \$15.00.

Early King—Medium size, good, hardy and productive. Very early. 10 for 35c; 100 for \$2.00.

Eldorado—Medium size, jet black, melting, sweet and rich; hardy and productive. 10 for 35c; 100 for \$2.00.

Kittatinny—Large, glossy black; juicy, sweet. 10 for 35c; 100 for \$2.00.

Rathbun—Berries extra large, jet black, good. 10 for 35c; 100 for \$2.00; 1000 for \$15.00.

Snyder—Medium size, sweet and melting to the core. Very hardy and wonderfully productive. 10 for 35c; 100 for \$2.00; 1000 for \$15.00.

DEWBERRY

Lucretia—A trailing variety of the blackberry. Large and handsome. 10 for 35c; 100 for \$2.00.

Snowball Hydrangea. New Hardy Summer Flowering Hydrangea

CURRENTS

TWO YEAR PLANTS

CURRENTS can be successfully planted in the Fall or Spring. Being perfectly hardy, they do not suffer injury from the Winter.

To destroy the currant worm, dust the plants with white hellebore when they are wet with dew.

Fay's Prolific

Black—Esteemed by many. Each 8c; 10 for 60c; 100 for \$5.00.

Cherry—Large, red; bunches short; plant vigorous and productive. Each 8c; 10 for 60c; 100 for \$5.00.

Fay's Prolific—The most popular red currant: fruit very large and handsome. Each 8c; 10 for 60c; 100 for \$5.00; 1000 for \$40.00.

Perfection—Berry very large, larger than Fay's; bright red. Each 15c; 10 for \$1.30; 100 for \$12.00.

Red Cross—A fine red currant of large size. Each 8c; 10 for 60c; 100 for \$5.00.

Victoria—Large, bright red. Late. Each 8c; 10 for 60c; 100 for \$5.00.

White Grape—Very large, mild and excellent. The best table variety. Each 8c; 10 for 60c; 100 for \$5.00.

Wildcr—Large, red, fine flavored; great yielder, very profitable for market. Each 8c; 10 for 60c; 100 for \$5.00.

GOOSEBERRIES

Two Year Plants.

Columbus—Of the largest size, greenish yellow, excellent. Each 12c; 10 for 90c; 100 for \$8.00.

Downing—Medium size, whitish green. Very profitable for market. Each 10c; 10 for 80c; 100 for \$7.00.

Industry—Large, oval, dark red, hairy. Rich. Each 18c; 10 for \$1.50; 100 for \$12.00.

Red Jacket (Josselyn)—Large, red. Good. Each 12c; 10 for 90c; 100 for \$8.00.

OUR BARGAIN COUNTER

YOU CANNOT AFFORD
TO MISS IT

These are Real Bargains because both the trees and the varieties are good and are offered very cheap, but in all cases the selection of varieties is to be left with us absolutely. **WE CANNOT MAKE ANY CHANGE FROM THIS RULE.**

100 Standard Apples	\$20.00
100 Standard Pears	10.00
100 Dwarf Pears	6.00
100 Cherry trees	10.00
100 Plum trees	10.00
100 Peach trees	8.00
100 Quince trees	15.00

These will be sold only in 100 lots of each.

California Privet Hedge

RASPBERRIES

STRONG PLANTS

TO keep a Raspberry bed in good productive condition, the old, weak and dead wood should be cut out every season, to give strength to the young shoots for the next year's bearing. In the Spring the weakest suckers should be removed, leaving five or six of the strongest in each hill. The ground should be spaded and a top dressing of manure given.

BLACKCAPS CANNOT BE PLANTED IN THE FALL.

RED RASPBERRIES

Columbian—Very large, dark red, bordering on purple; hardy and very productive. Fine for canning. 10 for 35c; 100 for \$1.40; 1000 for \$12.00.

Cuthbert—Large, deep rich crimson. Very hardy. One of the best varieties for market. 10 for 35c; 100 for \$1.40; 1000 for \$12.00.

Marlboro—The best early red raspberry. Hardy and productive. 10 for 35c; 100 for \$1.40; 1000 for \$12.00.

BLACK RASPBERRIES

Black Diamond—Valuable market sort. 10 for 35c; 100 for \$1.40; 1000 for \$12.00.

GREGG—Fruit large, good quality, season medium; hardy, a great yieder. 10 for 35c; 100 for \$1.40; 1000 for \$12.00.

KANSAS—Very large, handsome, firm and of excellent quality, very hardy and productive. 10 for 35c; 100 for \$1.40; 1000 for \$12.00.

YELLOW RASPBERRIES

Golden Queen—Large, amber color; firm and of fine quality. Hardy. 10 for 40c; 100 for \$3.00.

STRAWBERRIES

The strawberry may be successfully grown in any soil adapted to the growth of ordinary field or garden crops.

Where the winters are severe a slight covering of leaves or litter, or the branches of evergreens, will be of great service.

All varieties—10 for 35c; 100 for 60c; 1000 for \$5.00.

Brandywine—Large, fine quality. Late.

Bubach—Large, bright scarlet. Early to medium.

Corsican—A magnificent variety. Large red.

Sweet Syringa or Mock Orange

FREIGHT PREPAID on all orders amounting to \$5.00 or more, east of the Mississippi River

Shrub Planting between curb and walk. Very effective and beautiful

HEDGES

Hedges are very popular and are rapidly taking the place of fences. This is particularly true of **California Privet** which is undoubtedly the most popular and the most extensively planted for that purpose.

To make a dense hedge of **California Privet** the plants should be set in double rows nine inches apart alternating the plants in the rows. A good hedge can also be made by planting a single row nine inches apart, or even twelve

inches. 18-24 in., 100 for \$2.50; 1000 for \$22.00. 2-3 ft., 100 for \$4.00; 1000 for \$32.00

The best low growing hedge is the **Thunberg's Barberry** which should be planted in single rows twelve inches apart. 12-18 in., 100 for \$8.00. 18-24 in., 100 for \$10.00.

Another first class hedge, and one which is valuable for defense on account of its sharp thorns, is the **Japan Quince**. Plant this in single rows twelve inches apart. 12-18 in., 100 for \$6.00. 18-24 in., 100 for \$8.00.

For an Evergreen Hedge the best cheap hedge is the **American Arbor Vitae** which should be planted in single rows twelve inches apart. 12-18 in., 100 for \$10.00. 18-24 in., 100 for \$14.00.

Shrub Planting and Hedges in a City Yard

Row of Crimson Ramblers

HARDY ROSES

Two Years—Field Grown Plants.

Roses are one of our specialties. All plants are field grown and large strong bushes and will blossom first season after planting.

CLIMBERS

Each 25c; 10 for \$2.00.

Baltimore Belle—Beautiful double white. An old well known sort.

Crimson Rambler—The finest of all climbing roses. Brilliant crimson. Double.

Dorothy Perkins—A truly wonderful rose. Double pink. The best pink rambler.

Hiawatha—Sheets of dazzling crimson single flowers.

Queen of Prairies—The old well known sort. Double deep pink.

Wichuriana—Pretty single white, glossy foliage. Sometimes called **Memorial Rose** on account of its popularity for cemetery planting.
